

SB STOCKS

The Ultimate Paper Trading Platform

Core Features Overview

SB Stocks is a user-friendly web application designed for stock market enthusiasts to practice and improve their trading skills without financial risk. By combining a clean interface with comprehensive stock data and robust portfolio management tools, the platform ensures that every trading journey is both insightful and engaging.

1. User Registration & Authentication

Secure sign-up and login process providing access to highly personalized dashboards tailored to individual user needs.

2. Real-Time Market Data

Experience live US stock prices, instant updates, and real-time market trends to ensure the most accurate and realistic trading simulations.

3. Historical Data & Trends

Access extensive stock performance history. Analyze historical trends and patterns to test and validate your trading strategies effectively.

4. Virtual Portfolios

- Create and manage multiple custom portfolios featuring a diverse range of stocks.
- Track overall portfolio performance, monitor virtual profits, and calculate losses over time.

5. Transaction Management

Maintain a detailed, comprehensive log of all simulated buy and sell activities, securely linked to specific users and their respective stock choices.

6. Comprehensive Stock Listings

Browse, search, and filter through a wide and diverse range of stocks currently listed in the United States stock market.

7. Strategy Testing & Analysis

Utilize powerful tools to analyze past performance, refine existing approaches, and confidently test new trading strategies.

8. User-Friendly Interface

An intuitive, clean, and modern design crafted to provide a seamless educational experience for both beginners exploring the basics and advanced traders testing new waters.
